

Comodo Wildcard Certificates

Secure all Sub-Domains of your Website with a Single Certificate

Features and benefits

- Save time and money – secure unlimited sub-domains with a single certificate
- Full organization validated certificate
- Highest levels of SSL security – 2048 bit digital signatures and up to 256 bit encryption as standard
- Simple and convenient – only one certificate to manage instead of many
- Highly visible site seal builds trust and aids customer conversion
- 99.9% browser recognition maximizes your potential customer base
- Peace of mind with our 30 day refund policies
- Licensed for unlimited number of sub-domains on an unlimited number of physical servers
- Expert phone, mail and web support
- 30 day money back guarantee
- \$250,000 relying party warranty

Comodo Wildcard certificates save your business time and money by allowing you to secure your domain and all sub-domains with a single certificate. Featuring highest available levels of encryption, unlimited server licenses, dedicated customer support and a huge \$250K warranty, Comodo Wildcard certificates allow you to simplify SSL management processes and save you money versus individual certificate purchases.

Convenience of a Single Certificate

Wildcard certificates work the same way as a regular SSL Certificate, allowing you to secure the connection between your website and your site visitor's browser – with one major advantage! A single Comodo Wildcard certificate covers all of the sub-domains of your main domain without the need to purchase or manage multiple certificates.

For example, a single wildcard certificate for *.domain.com can be used for:

- www.domain.com
- secure.domain.com
- mail.domain.com
- login.domain.com
- anything.domain.com

If your business decides to add more sub-domains at any time then they are automatically covered under the same certificate. You don't pay any additional cost – just copy the same certificate to the new sub-domain and you're set.

Speed of Issuance & Validation Levels

Thanks to the revolutionary capabilities of IdAuthority, the identity assurance provider, Comodo Wildcard certificates

are delivered to you faster than any other provider whilst adhering to the same stringent, two-step validation process. The result is a highly trusted Certificate that does not undermine consumer confidence with the SSL protocol.

Highest Encryption Strength

2048 bit signatures and up to 256 encryption means Comodo Wildcard certificates offer the highest possible levels of security for your customers. The key length complies with the National Institute of Standards and Technology (NIST) recommendations.

99.9% Browser Coverage

Comodo root certificates are embedded in all major browsers and devices, making them recognized by 99.9% of the Internet population and maximizing the reach of your business.

Build Customer Trust and Increase Online Sales

In today's highly competitive e-commerce world, building a sense of trust and security in the minds of your website visitors is key to converting them to

customers. Comodo's high impact site seal does just that by instantly reassuring your visitors that your site is protected with SSL security from one of the most recognized brands in Internet security. Each seal also features unique 'point-to-verify' technology which shows real time verification of your business credentials and the relying party warranty whenever a visitor hovers their mouse cursor over the seal.

Free PCI Scanning. Free Daily Vulnerability Scanning

Each Comodo Wildcard SSL customer also receives a great value-add package of free services, including:

- **HackerGuardian** – free for a year. HackerGuardian is Comodo's PCI (Payment Card Industry) vulnerability scanning service that helps qualifying merchants demonstrate scan compliance to their acquiring bank. Comodo is a registered PCI ASV (Approved Scanning Vendor).
- **HackerProof** – free for a year. HackerProof is a daily vulnerability scanning service that audits and identifies security holes on your website. Each website that passes the HackerProof daily scan is allowed to display the 'HackerProof' trust seal – helping turn visitors into customers by establishing trust and confidence.

Comodo Wildcard Certificates with SGC

Comodo Wildcard certificates are also available with Server-Gated Cryptographic (SGC) technology. SGC-enabled certificates significantly enhance the encryption of old legacy browsers, which are not capable of stronger encryption levels.

Comprehensive Support Plans

Comodo has a well earned reputation for industry leading customer care and technical support. As a valued customer, you can expect prompt telephone, mail and web-based support for any questions you may have during the application, installation and lifetime of the certificate.

Why Comodo Wildcard Certificates?

Starting at only \$334.95 per year, Comodo Wildcard certificates are the perfect solution for any online business looking to quickly and effectively secure all sub-domains of their website. All the features, compatibility and warranty of our single domain certificate are included and, unlike other providers, we do not double, triple, or spike the price of your certificate for every additional server. Each wildcard certificate comes with unlimited server licensing, so you can install it on as many physical servers as you wish. Comodo Wildcard certificates save you time and money over single certificate purchases and quickly provide your website with the security and trust your customers expect.

Comodo Wildcard Certificate - Supported Applications, Operating Systems & Platforms

Extended Validation Browsers

- Microsoft Internet Explorer 7+
- Opera 9.5+
- Firefox 3+
- Google Chrome 0.3.154.9 +
- Apple Safari 3.2 +
- Apple iPhone 3.0 +

Web Browsers (SSL/TLS enabled)

- Microsoft Internet Explorer (IE) 5.01+
- Mozilla Firefox 1.0+
- Opera 6.1+
- Apple Safari 1.0+
- Google Chrome
- AOL 5+
- Netscape Communicator 4.51+
- Red Hat Linux Konqueror (KDE)
- Microsoft WebTV
- Camino
- Konqueror (KDE) 2.0.0 +

Email Clients (S/MIME)

- Microsoft Outlook 99+
- Microsoft Entourage (OS/X)
- Mozilla Thunderbird 1.0+
- Qualcomm Eudora 6.2+
- Lotus Notes (6+)
- Netscape Communicator 4.51+
- Mulberry Mail
- Apple Mail
- Mail.app
- Windows Mail
- The Bat
- Major Operating Systems
- Microsoft Windows XP, Vista and 7 (all versions inc 32/64 bit)
- Apple MAC OS 9.0+ (circa 2002), includes 10.5.X and 10.6.X
- All Major Linux Distributions (Debian, Ubuntu etc)

API Support within Hosting Control Panels

- WHMCS

- Ubersmith

Mobile OS, Micro Browsers, Handsets & Game Consoles

- Android (inclusion carrier specific)
- Apple iPhone, iPod Safari
- Microsoft Windows Mobile 5/6
- Microsoft Windows CE 4.0
- Microsoft Internet Explorer Pocket PC 2003
- Microsoft Internet Explorer Smartphone 2003
- RIM Blackberry 4.3.0
- NTT / DoCoMo
- SoftBank Mobile
- KDDI
- Brew
- PalmOS 5.x
- Netfront 3.0+
- Opera 4.10+
- Openwave mobile browser 6.20+
- Major Operators inc. Vodafone, Orange, AT&T
- Major Handset providers SonyEricsson, Nokia,

Alcatel & Palm (S40/S60/S80/OSSO) based Handsets from 2002

- Sony PlayStation Portable
- Sony PlayStation 3
- Nintendo Wii

Application Suites

- Microsoft Authenticode & Visual Basic for Applications (VBA)
- Adobe AIR
- Sun Java JRE (1.4.2 Update 16+, 5.0 Update 13+, 6 Update 3+)
- Mozilla Suite v0.9.8+
- SeaMonkey
- OpenSSL.org's OpenSSL v0.9.5+
- Google Checkout

Document Security Platforms

- Microsoft Office (Word, Excel, Powerpoint, Access, InfoPath)
